Cannabis legalization around the corner

Topic: With the approval of the "Cannabis Act", which is now expected to take place at the beginning of April, Germany is seen to take a big leap forward in regards to legalizing cannabis. This should translate into a significant tailwind for players such as Cantourage.

As per consistent and reliable German media reports from ZEIT, dpa and Berliner Morgenpost, the governing coalition of SPD, Greens and FDP has finalized the specifics for the legalization of cannabis. The legislation is scheduled to take effect on April 1st.

Once the "Cannabis Act" becomes effective, Germany will not only allow adults to own 25 grams of cannabis, grow up to three plants and establish non-profit cannabis clubs but cannabis will also loose its narcotic drug status. Cantourage should particularly benefit from the latter as it significantly simplifies the process of getting a prescription for medical cannabis. In fact, it should get as easy as getting one for ibuprofen 600.

With this, the number of patients should remain on a stellar growth path at the expense of the black market (~4m cannabis users as of 2021) and in favour of established players such as Cantourage. In Canada, the number of medial cannabis patients grew from 24k in 2015 to 330k in 2018, the year of the full legalization. Thanks to its broad global supplier network with more than 60 grower partners, its own recently launched telemedicine platform, telecan°, and a growing distribution network across Europe, we regard Cantourage as well positioned to benefit from this change. In fact, the company looks set to grow sales at a 59% CAGR (2022-25e) while at the same time reaching a high single-digit EBITDA margins thanks to the resulting operating leverage.

Ending FY23e on a high note. Following 9M results with € 17.2m sales (+85% yoy) and EBITDA of € -0.4m, the forth quarter looks set to remain on a strong growth trajectory: sales +54% yoy to € 7.5m and EBITDA of € 0.6m. Above all, this should be carried by the ongoing ramp-up, i.e. a gradually increasing number of fully onboarded cultivators having a product deployed at pharmacies.

We confirm our BUY rating with an unchanged € 11 PT, based on DCF.

1. General Information/Liabilities

This research report has been produced for the information purposes of institutional investors only, and is not in any way a personal recommendation, offer or solicitation to buy or sell the financial instruments mentioned herein. The document is confidential and is made available by NuWays AG exclusively to selected recipients in the European Union (EU) or, in individual cases, also in other countries. It is not allowed to pass the research report on to persons other than the intended recipient without the permission of NuWays AG. Reproduction of this document, in whole or in part, is not permitted without prior permission NuWays AG. All rights reserved.

Under no circumstances shall NuWays AG, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report – neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.

2. Responsibilities

This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently. The content of the research report was not influenced by the issuer of the analysed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.

3. Organisational Requirements

NuWays AG took internal organisational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of NuWays AG involved in the preparation of the research report are subject to internal compliance regulations. No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis. In case a research analyst or a closely related person is confronted with a conflict of interest, the research analyst is restricted from covering this company.

4. Information Concerning the Methods of Valuation/Update

The determination of the fair value per share, i.e. the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow – DCF model. Furthermore, a peer group comparison is made.

The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate of 7.5%. The operating cash flow is calculated as EBITDA less maintenance capex and taxes.

Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjust-

ment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value.

NuWays AG uses the following three-step rating system for the analysed com-

Buy: Sustainable upside potential of more than 20% within 12 months

Sell: Sustainable downside potential of more than 20% within 12 months.

Hold: Upside/downside potential is limited. No immediate catalyst visible.

The decision on the choice of the financial instruments analysed in this document was solely made by NuWays AG. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of NuWays AG whether and when it publishes an update to this research report, but in general updates are created on a regular basis, after 6 months at the latest. A sensitivity analysis is included and published in company's initial studies.

5. Major Sources of Information

Part of the information required for this research report was made available by the issuer of the financial instrument. Furthermore, this report is based on publicly available sources (such as, for example, Bloomberg, Reuters, VWD-Trader and the relevant daily press) believed to be reliable. NuWays AG has checked the information for plausibility but not for accuracy or completeness.
